

# Top 5 reasons to upgrade Infor CloudSuite Industrial (SyteLine)

Infor CloudSuite™ Industrial (SyteLine) is a robust ERP solution with built-in best practices and highly efficient process flows to help manufacturers improve productivity.

1

## ENHANCED INDUSTRY CAPABILITIES WITH SIMPLIFIED UPGRADES

Infor® CloudSuite Industrial introduces a wide array of new, highly focused industry-specific capabilities, including specialized pricing and promotions and compliance features for manufacturers and distributors, as well as detailed industry packs tailored for automotive, printing and packaging, process, and molding companies. Combining industry capabilities ready right out of the box and the Infor OS platform, which includes the latest version of the Infor Mongoose development framework, manufacturers and distributors can reduce, eliminate, or reconfigure personalizations and modifications so future upgrades are less intrusive and easier to implement. Industry-specific best practices can be quickly implemented and easily integrated with other systems, including as part of a two-tier ERP strategy.

2

## BETTER ACCESS TO DECISION MAKING DATA

With an improved user experience, enhanced navigation, and easier access to information, Infor CloudSuite Industrial helps organizations improve teamwork and gain competitive advantage. With our versatile new responsive design master forms, Infor Ming.le™ homepages, 360 forms, and process forms, along with access to the latest Infor CloudSuite Analytics, KPIs, and dashboards with contextual analytics and Infor Document Management, manufacturers and distributors will have the information they need to make better decisions faster.

3

## MOBILE ACCESS ANYWHERE, ANYTIME

Infor CloudSuite Industrial's browser-based access allows manufacturers and distributors to gain better control, greater visibility, and easier management across the entire enterprise. Organizations have the flexibility to choose how, where, and when information is accessed from the solution. Companies can also take advantage of mobile applications, such as Infor Ming.le and CloudSuite Industrial Service Mobile.

4

## GLOBAL FINANCIAL CAPABILITIES

Infor CloudSuite Industrial's multi-book accounting capabilities help manufacturers and distributors stay flexible and grow their businesses around the world. CloudSuite Industrial helps organizations stay current with respect to taxation, reporting, rule-based accounting, electronic banking, and government messaging requirements in multiple countries.

5

## ACCESS ENTERPRISE CAPABILITIES FROM BEST-OF-BREED SOLUTIONS

Infor CloudSuite Industrial is a complete manufacturing and distribution solution with the flexibility and sophistication organizations need to quickly and easily expand their businesses. Infor CloudSuite Industrial provides a whole new level of capabilities to manage operations, including integration, social collaboration, and business intelligence. It offers access to best-of-breed solutions for customer relationship management, configure-price-quote, product lifecycle management, and more.

Pick/Pack/Ship enhancements	Integration to Infor XM	Portals in multi-tenant cloud
Finance enhancements	UX Enhancements—Responsive design	Infor Rhythm
Human Resource enhancements		Infor Approva
Employee self-service portal		GDPR updates
Process Manufacturing		Infor HCM
Infor PLM Accelerate		Infor Birst

## STRATEGIC OBJECTIVES

### Lower Total Cost of Ownership

Continue to minimize total cost of ownership with the expansion of industry and manufacturing solutions, such as adding support for multi-site to minimize the need for customizations.

Manufacturers and distributors can also take advantage of the new Infor Mongoose application development framework to support new extensibility and reporting.

### Specialize by Industry

Deliver specialized functionality for focus industries, including printing and packaging, automotive suppliers, injection molding, process manufacturing, and more; add prepackaged integration, role-based business process flows, and analytic content, including electronic signature, service management, shop floor automation, dimensional inventory, and approved manufacturers.

### Enable Application Integration

Provide high-value expansion opportunities to easily integrate with other ERPs in support of a two-tier ERP strategy, as well as packaged integrations to Infor solutions, including: Birst®, Configure Price Quote, (CPQ), Infor CRM, Enterprise Asset Management (EAM), Expense Management (XM), Factory Track, Infor HCM, Infor PLM, Rhythm®, and Supply Chain Execution (SCE).

### Make Upgrades Seamless

Enable customers to upgrade easily and efficiently through predefined content packs, cloud or phased upgrades, and mobile applications.

With the new Infor Mongoose application development framework organizations can support automatic reviews when they run form sync during upgrade.

## OS & PLATFORM HIGHLIGHTS

### Move to the Future with New ION Integrations to Extension Apps

Provides a more compelling extended suite with a less risky, lower cost way to take advantage of new, high value capabilities. Includes out-of-the box integration to Infor solutions, and provides support for corporate finance strategies for two-tier ERP deployments.

### New, Modern User Experience—Social and Mobile

Reinvented user experience provides a completely modern solution, while delivering more robust functionality through compelling workflows built in to the application and across a broader suite. Our new responsive design for master forms, role-based Ming.le homepages, new contextual KPIs and document management applications, new reports forms and data view reports, and design mode supported through a web browser helps you create your own unique experience.

### Expanded Micro-vertical Functionality with Focused Industry Packs

Automotive suppliers, printing and packaging, process manufacturing, and molding/ plastics fabrication companies can take advantage of and extend their core ERP investment with the best-of-breed, last-mile industry functionality within CloudSuite Industrial.

### More Robust Business Intelligence

First business intelligence helps customers and prospects get more value out of their deployment by enabling better, expanded visibility into the business at all levels, to drive better decision making.

New executive dashboards based on specific KPIs from the Infor Value Engineering team are tailored for unique user roles and business functions across the enterprise.

## CORE FEATURES

Infor OS

Data search across entire application

Data view actions and styles

Multisite support for customer order creation across different entities

Web rendering updates

- To Excel®
- Menu and keyboard shortcuts

New form and dataview reporting

Multi-currency AR and AP

Enhanced Microsoft® Office integration

Communication wizard email blasts

Electronic signature capture

Dimensional inventory

General ledger analysis dimensions

Approved manufacturers

Batching

Scrap and yield

Printing and Packaging Industry pack

- Quoting and estimating
- New workbenches
- Material tracking

Enhanced picking, packing, and shipping

- FedEx and UPS integration
- Shipping labels

Credit Card Interface improvements

APS/MRP demand and plan detail charts

Inventory control—cycle count variance reporting

Allocation enhancements

Cradle to grave lot and serial tracking

Container inventory

Consigned inventory portals

- Customer
- Vendor

Mobile

Auto vouchering

Multicurrency payments

IFRS certification

Control accounts

Quick journal entries

Surcharges

Promotions and rebates

Multi-Books

Global payroll interface

GDPR

360 forms

Employee self-service

## COMMON COMPONENT ADOPTION

### INTEGRATIONS

Infor OS

Configure Price Quote (CPQ)

Customer Relationship Management (CRM)

Enterprise Asset Management (EAM)

Expense Management (XM)

Dynamic Enterprise Performance Management (d/EPM)

PLM Accelerate

Factory Track: Warehouse Mobility, Shop Floor, and Time Track

Rhythm

HCM

Birst

SCE/WMS

### ANALYTICS

DataViews Critical Numbers (KPIs)

Infor BI and Infor CloudSuite (SyteLine) BI Content

Birst

CloudSuite Industrial content for Birst Ming.le home page widgets

### MOBILE

Infor Ming.le

CloudSuite Industrial Service Mobile

CloudSuite Industrial Mobile

IDM

Expense Management

### MICRO-VERTICALS

Metal Fabrication

Plastics Fabrication

Medical Devices

Windows and Doors

Furniture and Fixtures

High Tech

Aerospace

Automotive—Tier Suppliers

Specialty Vehicles

Sand and Aggregates

Food and Beverage

General Discrete Manufacturing

# Infor CloudSuite Industrial (SyteLine): **Why Upgrade?**
